Biology 125H Honors Marine Biology

Student Learning Outcomes

- 1. Students will be able to recognize and/or explain aspects of the major geological, physical and/or chemical oceanographic processes and how they affect marine organisms.
- 2. Students will be able to recognize and/or summarize the defining anatomical and/or physiological characteristics among the major phyla of marine organisms.
- 3. Students will be able to identify and/or explain the ecological characteristics of the major marine ecosystems and the impact that humans have had on them.
